Facebook is a [corporation](#) and [online social networking service](#) headquartered in [Menlo Park, California](#), in the [United States](#). Its website was launched on February 4, 2004, by [Mark Zuckerberg](#) with his [Harvard College](#) roommates and fellow students [Eduardo Saverin](#), [Andrew McCollum](#), [Dustin Moskovitz](#) and [Chris Hughes](#).^{[8][9][10]} The founders had initially limited the website's membership to Harvard students, but later expanded it to colleges in the Boston area, the [Ivy League](#), and [Stanford University](#). It gradually added support for students at various other universities and later to high-school students. Since 2006, anyone who is at least 13 years old was allowed to become a registered user of the website, though the age requirement may be higher depending on applicable local laws.^[11] Its name comes from the [face book](#) directories often given to American university students.^[12]

Add-on Information Retrieval vs. Data Retrieval

	Information Retrieval i.e. Search Engines	Data Retrieval i.e. Databases
Purpose	retrieve information based on query keywords	retrieve records based on well-formed terms
Query Language	human language, limited formal syntax, i.e. search modifier	formal language, logic, regular expressions
Expectation	information about the content, fuzzyness accepted	exact evaluation, single error means failure
Order	a result ranking based on user expectation, implicit order	none or explicit order may be given in query
Users	Humans (sometimes Software)	Machines / Software
Semantics	enrichment about result domain using facets by default	result grouping possible on demand
